## CAT Overview

Since 1970, the Center for Addiction Treatment (CAT) has provided high-quality affordable treatment for patients with addiction to drugs, alcohol or gambling. As the only non-hospital-based, non-profit medically monitored detox facility in the region, CAT provides individualized care through short-term residential and outpatient counseling services, medication-assisted treatment, a continuing care program and a comprehensive family education program. Today CAT has thousands of alums who are on the path to recovery and leading sober lives.

**Founded** | 1970

---------------------------	---

## Our Response to COVID-19

While keeping staff and those we serve safe, CAT is continuing to provide a full range of services:

- Diagnostic assessments by telehealth
- Case management & counseling via telehealth
- Only community-based, medically monitored detox in the region
- Residential treatment
- Medication assisted treatment (MAT)
- Any health concern related to alcohol and other drug addiction

To assist those in recovery, CAT has also begun using Ohio Telehealth to continue to provide outpatient individual and group counseling services.

## WHAT TO EXPECT ON YOUR VISIT DURING COVID-19

Inside building traffic is minimized to just patients and staff during COVID. Family/friends members who are dropping patients off are asked to wait in their cars until a patient has been cleared to stay.

Upon arriving patient temperatures are taken and are surveyed with specific COVID questions to ensure exposure has been limited.

Once admitted, new patients will receive a series of screening tests including a COVID nasal swab

CAT personnel are required to wear a mask. For your safety, masks are strongly recommended. If you do not have a mask, one can be provided.
